DEMENTIA GRANTS PROGRAM

DEMENTIA AUSTRALIA RESEARCH FOUNDATION –
PROJECT GRANTS AND TRAINING FELLOWSHIPS

INFORMATION FOR APPLICANTS
2018
BEFORE YOU BEGIN

This document contains important information for applicants regarding the application procedure and eligibility conditions for the 2018 Dementia Australia Research Foundation Project Grants and Training Fellowships.

Applicants should read all the information included in this document and liaise with their host institution’s research office before contacting the Foundation with any queries regarding the application process or eligibility conditions.

Key Dates
- **Applications Open:** 4 July 2018 (9.00 am AEST)
- **Applications Close:** 13 August 2018 (5.00 pm AEST)

**LATE APPLICATIONS WILL NOT BE ACCEPTED**

- **Outcomes Announced:** December 2018
- **Funding Commences:** March 2019, or by arrangement

INTRODUCTION

The Dementia Australia Research Foundation is the research arm of Dementia Australia. The Foundation provides funding to support new and emerging dementia researchers, works with people with dementia and carers to ensure that research reflects their concerns and promotes understanding and awareness of dementia research among the general community. The Foundation is entirely funded by donations and support from members of the public and Australian businesses and is managed by Dementia Australia (Barton Office). Further information about the Foundation including previous grant rounds and outcomes can be found at: [https://www.dementia.org.au/research](https://www.dementia.org.au/research).

The Foundation also advertises, assesses and administers grants on behalf of Dementia Australia Research Foundation – Victoria, a separately incorporated research foundation also governed by Dementia Australia. Established in 2012, the Dementia Australia Research Foundation – Victoria provides research grants to Australian based dementia researchers, with priority given to projects with potential benefits for Victorians. The grant applicants use the same application form and the applications are subject to the same review process as other project grant applications.

The information in this booklet is designed to help those intending to apply for funding through the Dementia Australia Research Foundation Project Grants and Training Fellowships. Applicants should read this document thoroughly to understand the grant conditions and application procedure. In most cases the answer to ‘frequently asked questions’ are covered in this document. Any unanswered questions can be put in writing to foundation@dementia.org.au.
OVERVIEW – 2018 DEMENTIA GRANTS PROGRAM (ROUND 2)

The total value of the 2018 Dementia Grants Program is just over $2 million and is split over two funding rounds:

- Round 1: Dementia Australia Research Foundation – Yulgilbar Innovation Grant (applications now closed)
- Round 2: Project Grants and Training Fellowships

Up to 13 Project Grants and up to 2 Training Fellowships are on offer in Round 2. An overview of these awards is presented in the table below:

Overheads (e.g. an infrastructure levy) are not covered by the Project Grant or Training Fellowship. As the Dementia Australia Research Foundation (Alzheimer’s Australia Dementia Research Foundation) is currently listed on the Australia Competitive Grants Register (ACGR), infrastructure costs will be covered by the Commonwealth Government’s Research Block Grants scheme.
DEMENTIA AUSTRALIA RESEARCH FOUNDATION – PROJECT GRANTS

Purpose

Research needs bright and talented scientists to focus on the growing challenge dementia poses to current and future generations of Australians. The purpose of the Dementia Australia Research Foundation – Project Grant scheme is to build capacity in the field of dementia research by supporting new, early and mid-career researchers. The Project Grants are intended to help new investigators establish their careers as independent dementia researchers by supporting small, time-limited research projects, or pilot projects.

Project Grants can be used to fund stand-alone research projects or projects that are attached to larger research programs. In such cases, there must be clear demarcation between the activities and the outcomes of the funded project and those of the larger project. The funds may also be used to support pilot projects. If an application is made for pilot study funding then this should be clearly stated and explained in the application.

Please note that Dementia Australia Research Foundation will not consider projects that significantly overlap with existing in-house projects of Dementia Australia, or projects that do not align with the mission of Dementia Australia.

Examples of the types of research projects funded in the past can be found on the Foundation’s website: https://www.dementia.org.au/research/our-researchers.

Topic and Scope

Dementia Australia Research Foundation Project Grants

The Dementia Australia Research Foundation Project Grants are open to Australian-based dementia researchers undertaking projects across all forms of dementia and in any topic area; biomedical (lab-based), clinical, psychosocial, or knowledge translation research projects will be considered. Topics may include, but are not limited to:

- Gaining a better understanding of the causes of dementia.
- Developing strategies to reduce dementia risk and slow the progression of the disease.
- Providing accurate and timely diagnoses.
- Improving treatment and care options for people living with dementia.
- Increasing the awareness and understanding of rights, needs and experiences of people with dementia, their carers and families.
- Finding a cure for dementia.
Dementia Australia Research Foundation – Victoria Project Grants

Dementia Australia Research Foundation – Victoria Project Grants are open to Australian-based dementia researchers, but priority will be given to projects based in Victoria, or with potential benefits especially relevant to Victorians living with dementia, their carers and families.

Dementia Australia Research Foundation – Victoria Project Grants will be awarded in clinical or psychosocial research areas only. Lab-based biological and/or non-clinical research, including animal studies, will not be considered. Priority will be given to funding research that is likely to directly benefit people with dementia, their carers and families, especially, but not exclusively, in the six priority areas listed below. The highest ranked project will be awarded the Cecilia Margaret Hudson Dementia Research Grant.

- The less common forms of dementia, i.e. non-Alzheimer’s dementias including frontotemporal dementia and dementia with Lewy bodies. Applications for projects addressing the unmet needs of people living with these conditions, their carers and families are invited.

- Assistive technologies that can help improve the quality of life of people with dementia, their carers and families i.e. research about what is needed and what works to inform future service provision planning.

- Supporting carers and families i.e. research that addresses how carers and families can be better supported, including those living in rural and remote areas, or how carers and families can better support the person with dementia, will receive priority for funding.

- Timely detection and management of medical comorbidities in hospitals and residential aged care i.e. research addressing models of care describing what hospitals need to do to provide optimal care for people with dementia.

- Translational research i.e. moving evidence into practice.

- Care systems and resourcing in residential care i.e. research into clinical care practices, pain management, workforce skills and training, specific care systems.

The Hazel Hawke Research Grant in Dementia Care

One Project Grant has been made available through funding from the Hazel Hawke Alzheimer’s Research and Care Fund. The Hazel Hawke Research Grant in Dementia Care is awarded for research aimed at improving the quality of dementia care across Australia and the services that people living with dementia and their carers receive. Further information about the history and aims of the Fund can be found at https://www.dementia.org.au/research/hazel-hawke-alzheimers-research-and-care-fund.
Project Team

The individuals applying for funds must have the research credentials and appropriate strength in proposal and team. We encourage applications from multi-disciplinary teams including scientists, biotechnology, health professionals and public health researchers. It is highly recommended that people living with dementia, their carers and families are involved throughout the project.

Award Funding

Each Project Grant is worth $75,000 and may be used over 1 to 2 years.

DEMENTIA AUSTRALIA RESEARCH FOUNDATION – TRAINING FELLOWSHIPS

Purpose

The purpose of the Dementia Australia Research Foundation Training Fellowship scheme is to fund up to two Australian health professionals to launch a career in dementia research. The award aims to build capacity in dementia research by encouraging medical practitioners, nurses and allied health professionals to develop ideas that will ultimately improve outcomes for people living with dementia, their carers and families. As such, the Fellowship may be used by the applicant to cover clinical time so that they may undertake a specific research project. It is expected that the Fellowship will enable applicants to transition to a PhD program in dementia research. Applicants will also need to be mentored by an experienced dementia researcher or team.

By the end of the Fellowship period, it is expected that the award recipient can demonstrate that dementia research is, or will become, an integral part of their professional career. It is expected that the applicant will produce outputs that will improve their competitiveness for further grant or postgraduate scholarship funding in the field, and enable them to conduct further substantial research and activities towards translating their findings into practice. Outputs may include publication and/or other evidence (e.g. resource development) of research dissemination or impact, acceptance into a PhD program or obtaining the qualifications needed to gain entry to a PhD, or obtaining a research or conjoint appointment.

Topic and Scope

The Training Fellowships are open to Australian-based health professionals undertaking projects across all forms of dementia and in any topic area; biomedical (lab-based), clinical, psychosocial, or knowledge translation research projects will be considered.
Topics may include, but are not limited to:

- Gaining a better understanding of the causes of dementia.
- Developing strategies to reduce dementia risk and slow the progression of the disease.
- Providing accurate and timely diagnoses.
- Improving treatment and care options for people living with dementia.
- Increasing the awareness and understanding of rights, needs and experience of people with dementia, their carers and families.
- Finding a cure for dementia.

Award Funding

Each Training Fellowship is worth $30,000 and may be used over 1 to 2 years. The funds may be used to cover the applicant’s salary and/or associated research activities.

ELIGIBILITY CRITERIA

To be eligible for a Project Grant:

1. At the time of acceptance and for the duration of a grant, the Applicant (Chief Investigator (CI)) must be an Australian or New Zealand citizen, a permanent resident of Australia, or have an appropriate work visa in place at the time of acceptance and for the duration of the project. All applicants must provide evidence to their host institution to support this criterion. Host institutions are responsible for certifying and ensuring that these requirements are met. The Dementia Australia Research Foundation may request further information in relation to these requirements, including evidence of residency and/or citizenship.

2. The CI must hold a PhD or equivalent (DPhil or M.D. by research), or have submitted a PhD thesis for examination prior to the proposed commencement date of the project.

3. The CI must hold an academic position at or below Level C seniority (i.e., below the level of Associate Professor or equivalent if not employed within the university system).

4. The research must be conducted in Australia and address the topic and scope of the funding round.

5. The research must be approved by an authorised ethics committee, if applicable. It should be noted that grant payments may be withheld until ethics approval has been obtained.
To be eligible for a Training Fellowship:

1. At the time of acceptance and for the duration of a grant, the Applicant (Chief Investigator (CI)) must be an Australian or New Zealand citizen, or a permanent resident of Australia. The CI must also be based in Australia for at least 80% of the funding period. All applicants must provide evidence to their host institution to support this criterion. Host institutions are responsible for certifying and ensuring that these requirements are met. The Dementia Australia Research Foundation may request further information in relation to these requirements, including evidence of residency and/or citizenship.

2. The CI must be a health professional (e.g., medicine, nursing, pharmacy, occupational therapy, dentistry, physiotherapy) prior to the commencement of the award.

3. The CI must not hold a PhD or equivalent (DPhil or M.D. by research) and must not be currently in receipt of a postgraduate scholarship. The CI may choose to enrol in a PhD or any other program of study during the course of the Fellowship. Applicants who are currently enrolled in a PhD and have completed no more than 12 months FTE of their degree at the time of application may also apply.

4. The CI must identify an experienced dementia researcher as a mentor.

5. The research must be conducted in Australia and address the topic and scope of the funding round.

6. The research must be approved by an authorised ethics committee, if applicable. It should be noted that grant payments may be withheld until ethics approval has been obtained.

For both Project Grant and Training Fellowship applications, the CI must demonstrate that:

1. People with dementia, their carers and families and the wider public (if appropriate) have been or are involved throughout the project (beyond their role as participants). This may be achieved in any number of ways:

   a. Consultation about the research proposal – to ensure that it addresses an identified area of priority.

   b. Inclusion as joint grant holders or co-applicants on your research proposal.

   c. Membership of a Steering Committee or Advisory Group or as a ‘research buddy’ for the researcher.

   d. Provide comment on and develop patient information leaflets or other research materials.
e. Involvement in the dissemination of research outcomes and the development of plain language project summaries.

Further information on involving members of the public in research is available here.

2. Appropriate language and terminology is used throughout the application. For example, many people with dementia prefer not to be referred to directly or indirectly as a ‘dementia sufferer’. A guide to dementia-friendly language is available at https://www.dementia.org.au/resources/dementia-language-guidelines.

Eligibility for multiple awards

Applicants are welcome to submit more than one Project Grant application for the same or different type of award. However, successful applicants can only be awarded one grant from any given Dementia Grants Program Round.

Eligibility of previous Dementia Australia Research Foundation award recipients

Previous recipients can apply to the Dementia Grants Program, as long as they meet all relevant eligibility criteria.

Resubmission of previous applications

Applicants are welcome to resubmit previously unsuccessful applications, which will be assessed on their merits alongside all other applications. It should be noted, however, that the Dementia Grants Program is becoming increasingly competitive, and applications who have been unsuccessful in previous years are very unlikely to progress to the final stages of assessment in subsequent years, unless substantial improvements have been made with respect to the assessment criteria.

Notification of additional funding

Applicants must notify the Dementia Australia Research Foundation if they receive funding from another source for a project that is the subject of a grant application to the Foundation.

Acknowledgement of support

Successful applicants must acknowledge the support of the Dementia Australia Research Foundation, or the Dementia Australia Research Foundation – Victoria, in all publications, presentations, summary findings and media announcements relating to the research. Grantees must also provide progress reports on the research and be prepared to assist the
Dementia Australia Research Foundation, if required, by speaking at functions, attending specified conferences, hosting laboratory visits, or being featured in media articles/releases.

**APPLICATION PROCEDURE**

**Online application form**

Applications must be submitted online via an application portal available through the Dementia Australia Research Foundation website ([https://www.dementia.org.au/research/grants](https://www.dementia.org.au/research/grants)). The portal will close at the advertised closing date, after which applicants will not be able to upload or modify any part of their application.

To start an application, applicants will click on the link that corresponds to the award that they are applying for (i.e. Project Grant or Training Fellowship). Please note that you will be asked to create an account prior to completing the online application form. Log-in details will be sent to the email address you provide.

To ensure that all relevant information is entered, each page of the application form needs to be completed in full before moving onto the next. A template may be downloaded from the website at [https://www.dementia.org.au/research/grants/information-for-applicants](https://www.dementia.org.au/research/grants/information-for-applicants) to work on the application offline and to view each section of the application form.

If applicants experience technical errors when uploading an application, they can contact foundation@dementia.org.au.

Late applications, and applications sent by mail or email will not be accepted.

The online application form includes a number of required fields, such as:

- Details of each investigator on the research team (up to 4 investigators are permitted on the application form)
- Contact details of the host institution
- Project title
- Abstract (200 word limit)
- How research findings will be translated into practice (250 word limit)
- Lay project summary (200 word limit)
- Implications of the research (250 word limit)
- How people living with dementia, their carers, families and/or the wider public will be involved in the research (250 word limit)

When planning research involving people with dementia, applicants should make sure that they are familiar with the principles of and requirements for getting informed consent from people who may lack cognitive and/or legal capacity to provide written informed consent themselves.
Supporting documents and required attachments

As well as completing the online application form, applicants must provide the following supporting documents (in PDF format) on the application portal. Applications that do not include the required documentation will be considered ineligible and may not be assessed. Please note that attachments cannot be amended or added to the application after the application closing date.

1. Evidence of Australian or New Zealand citizenship, permanent residency or appropriate work visa (required for CI)
   Provide a scanned copy of a birth certificate, passport, visa documentation or official documentation from the Department of Immigration and Border Protection to your host institution (your institution may have this information on file). If applicable, an appropriate work visa must be in place at the time of acceptance and for the duration of the project. Statutory Declarations, Medicare cards, Australian driver’s licences or other documents will not be accepted as proof of permanent residency or citizenship.

2. Qualifications
   a) Project Grants – official record of PhD or equivalent higher degree
      A scanned copy of an academic transcript or degree showing PhD or equivalent higher degree. Applicants who are currently completing a doctorate degree at the time of application must provide proof of submission to the Foundation as soon as this becomes available. It is the responsibility of the applicant to ensure that confirmation of thesis approval is provided before funding can commence.

   b) Training Fellowships – official academic transcript
      A scanned copy of an academic transcript. Applicants who are currently completing an undergraduate or postgraduate degree at the time of application should provide their final grade to the Foundation as soon as this becomes available. It is the responsibility of the applicant to ensure that confirmation of their degree is provided before funding can commence.

3. Academic CV (maximum 10 pages, required for CI)
   Include publications, grants (funding body, amount and investigator status), awards, conference presentations and service to the academic community.

4. Research Proposal
   a) Projects Grants
      The Research Proposal should not exceed 7 pages, with a minimum font size of 11 and standard margins. Any additional pages, or any explanatory appendices, will not be assessed. The research proposal should include details on each of the following sections:

      a. **Aims**: List specific aims and potential significance of the project. Clearly state the research question and hypothesis to be tested, as well as the rationale and objectives of the project.

      b. **Background**: Summarise previous work in this field which provides the basis for the proposed research project.
c. **Research Methodology**: Include a clear description of methods and design, including the following, if applicable: participant recruitment strategy; participant inclusion/exclusion criteria; study design; intervention or manipulation; outcome measures; statistical analysis plan and rationale; safety and risk considerations; drug regimens; and special equipment or measures.

d. **Budget and timeline**: Provide a high-level budget and project timeline, noting the amount of funding available from The Foundation and timeframe (i.e. over 1 to 2 years). Identify any other confirmed funding for the project. Funds can only be applied to costs that are directly related to achieving the objectives and outcomes of the project, including reimbursements to people with dementia, their carers and families and/or the wider public for reasonable costs associated with their involvement in the project (e.g. their time, travel costs, phone calls). As the Dementia Australia Research Foundation listed on the Australian Competitive Grants Register, university infrastructure costs or levies do not need to be included in the budget.

e. **Key references**: Please include a list of up to 20 key references cited in the proposal.

b) **Training Fellowships**

The Research Proposal should not exceed 5 pages, with a minimum font size of 11 and standard margins. Any additional pages, or any explanatory appendices, will not be assessed. The research proposal should include details on each of the following sections:

a. **Fellowship plan**: Provide an overview of the activities that will be undertaken during the Fellowship including if applicable: your role on a research project(s); details of any planned study; and a summary of the experience and suitability of your proposed mentor and the research team that you will be working with.

b. **Research project**: Describe the aims, background and methodology of a research project that you will be working on during the Fellowship. This should include:

- The specific aims and potential significance of the project that will be undertaken during the Fellowship. Clearly state the research question and/or hypotheses to be tested, as well as the research project rationale and objectives.
- Previous work in this field which provides the basis for the proposed research project.
- A clear description of methods and design, including the following, if applicable: participant recruitment strategy; participant inclusion/exclusion criteria; study design; intervention or manipulation; outcome measures; statistical analysis plan and rationale; safety and risk considerations; drug regimens; and special equipment or measures.

c. **Key outcomes**: Please outline what will be achieved by the end of the Fellowship period (e.g. publication and/or other evidence of research dissemination or impact, application or acceptance to a PhD program, how the Fellowship will enable the applicant to transition into a career in dementia research).
d. **Budget and timeline**: Provide a high-level budget and project timeline, noting the amount of funding available from The Foundation and timeframe (i.e. over 1 to 2 years). Identify any other confirmed funding for the project. Funds can only be applied to costs that are directly related to achieving the objectives and outcomes of the project. For example, such costs could include clinical time, short-course fees, project costs and reimbursements to people with dementia, their carers and families and/or the wider public for reasonable costs associated with their involvement in the project (e.g. their time, travel costs, phone calls). University infrastructure costs or levies will not be covered by the Fellowship.

e. **Key references**: Please include a list of up to 20 key references cited in the proposal.

5. **Letter of support from mentor (Training Fellowship applicants only)**
   It is a requirement that the applicant identify a research team to work with and receive support from an experienced dementia researcher as mentor. A statement from the applicant’s mentor confirming their support of the applicant and the project, as described in the research proposal, is required. The statement should outline the previous mentoring experience of the mentor and what additional resources, if any, the mentor will contribute to the project.

6. **Ethics Approval** (if available)
   Evidence of approval of the proposed project by an authorised Human Research Ethics Committee, if available. If not available at time of application, funding agreements (for successful applicants) will be conditional upon ethics approval.

7. **Endorsement Form(s) signed by**:
   - Each investigator named in the application, confirming their contribution to the project as described in the application.
   - The Head of Administering Institution (or nominee) in which the research will take place.

   An endorsement form template is available at: https://www.dementia.org.au/research/grants/information-for-applicants.

**ASSESSMENT PROCESS**

The assessment process for all grant types involves the following stages:

1. **Eligibility check**

   Foundation staff will check all applications after the application closing date to ensure compliance with eligibility criteria and conditions of award. It is the applicant’s responsibility to ensure that they meet all eligibility criteria and conditions of the award prior to submitting an application. The Dementia Australia Research Foundation reserves the right to rule out of contention any application that does not include proof of eligibility without further assessment. Please note that applicants must inform the Dementia
Australia Research Foundation if their eligibility against the stated criteria changes in any way during the assessment process. Funding will not commence until all relevant requirements, including eligibility, have been met.

2. Initial Screening of applications

Members of the Scientific Panel will screen all eligible applications to identify those which are highly unlikely to receive an award due to weakness in one or more of the assessment criteria, or due to feasibility or other issues. Applications that are ranked in the bottom half of applications for a particular award by at least two members of the Scientific Panel are removed from the application process.

3. External review (if required)

Applications will be assessed by the Scientific Panel; expert external reviewers may be approached for selected comment and/or rating against the assessment criteria if required. Applicants are invited to nominate external reviewers if desired on the application form, but the decision on external reviewers is made by the Scientific Panel.

4. Final review and ranking by members of the Scientific Panel

Members of the Scientific Panel will consider and rank all remaining applications for each category of award after reviewing the feedback from external reviewers. Awards are allocated to applicants in order of ranking within each category and according to their eligibility for particular awards. Consideration is also made to supporting approximately equal numbers of applicants in biomedical and psychosocial research fields, where applications are of comparable quality. Applicants whose projects are considered fundable but are not allocated one of the available awards are placed on a reserve list and may be offered an award in the event that an applicant with a higher-ranked project turns down the award.

The final decision on awards is made by the Dementia Australia Research Foundation Board on the basis of recommendations made by the Scientific Panel.

Please be advised that all decisions are final, and there is no mechanism for appeal.

Notification of successful and unsuccessful applicants

Successful and unsuccessful applicants will be notified of the outcome of their application by email by December 2018; unsuccessful applicants may be notified earlier or later in the year, depending on the stage of assessment at which the decision is made. To facilitate notification, applicants must ensure that their contact details are filled in correctly on the application form.
Announcement of awards

An official announcement of the 2018 award winners will be made on the Dementia Australia Research Foundation website in December 2018. This announcement will detail each successful applicant’s name, type of award, project title and institution. Award winners will be expected to assist the Foundation, if required, by being featured in media articles/releases and public announcements related to an award from the Foundation.

Feedback to unsuccessful applicants

Unsuccessful applicants will be provided with general feedback that covers the strengths and weaknesses of all applications to the program. Individual feedback may be available on request.

Feedback is provided for the purpose of helping unsuccessful applicants improve the quality of subsequent applications to the Dementia Australia Research Foundation or other funding bodies. No correspondence regarding the accuracy or merits of feedback will be entered into.

ASSESSMENT CRITERIA

The following assessment criteria will be used for rating Project Grant applications:

1. Scientific Merit and Quality (50% weight)

   The significance and value of the proposed research is considered, along with the clarity of the research aim/s, hypotheses or research objectives, and the suitability of the research methodology and research plan in achieving the research aim/s. The general scientific relevance should be evident in the project proposal, and the research methodology should be sound and clearly presented. Projects must also be feasible and realistic within the available timeframe and budget.

2. Innovation and Originality (30% weight)

   This criterion considers the novelty and originality of the proposed project and the extent to which it has the capacity, if successful, to introduce innovative and new research directions in the field of dementia research, with benefit to people with dementia, their carers and families and the wider public.

3. Track record of the research team (20% weight)

   This criterion considers whether the research team’s previous research experience demonstrates that they are capable of successfully undertaking the proposed research and disseminating the outcomes. Track record of the CI (research training, publications, awards and other relevant experience) will be assessed relative to opportunity.
Training Fellowship applications will be evaluated according to the following criteria:

- The quality of the academic record and potential of the applicant.
- The suitability of the intended mentor and/or research team.
- The relevance of the research to be undertaken during the Fellowship including the significance, feasibility and merit of the proposal and expected outcomes or outputs.

FURTHER INFORMATION

For any enquiries please email: foundation@dementia.org.au. Further funding opportunities will be available through the Dementia Australia Research Foundation (see https://www.dementia.org.au/research/grants) throughout the year.
