<p>Investment required: \$25.3 million over 4 years</p>		<p>ESTIMATED BENEFITS:</p> <p>\$176 million over 4 years \$461 million over 10 years</p>
<p>Target population: 30,600 aged care workers, 1,000 residential aged care and Support at Home providers and 900 aged care and disability assessors.</p>		

In addition to our specific funding proposals, Dementia Australia is seeking Commonwealth action on four systemic issues of increasing urgency:

1. Monitor Aged Care Reforms

We urge the Government to proactively monitor the impact of the aged care reforms for people living with dementia, their families and carers, and to respond swiftly to resolve any issues or unintended consequences. Dementia Australia is committed to working with the Government to ensure that the aged care and disability service systems meet the needs of people impacted by dementia.

2. Access to Respite Services

Urgent independent review of respite services to improve access, affordability, and quality for people living with dementia and their carers.

3. Addressing Dementia Data Gaps

Fast-track efforts to close critical dementia data gaps, ensuring accurate information for planning, funding, and evaluating aged care services.

4. Improved Access to Dementia Prevention Supports

Systematically embed dementia prevention into primary care, supporting risk reduction through structured programs and incentives.
