

Your voice in medication management: **What matters most?**

This study has been approved by
Monash University Human Research
Ethics Committee (51517)

Are you or someone you care for:

1. **Aged 65 or older,**
(or aged 50 or older for Aboriginal or Torres Strait Islander)
2. **Taking 5 or more medications daily, AND**
3. **Requiring assistance with daily activities**
(e.g. walking aid, cooking, cleaning, bathing)

You are invited to join a **small group discussion** about what matters most when **managing multiple medications** for **older adults with dementia**

MONASH
University

An honorarium will be provided
