

What Your Word Knowledge Says About Your Brain

Researchers at Charles Darwin University are seeking older adults for a study on whether **simple online word-based tasks can help assess cognitive functioning**.

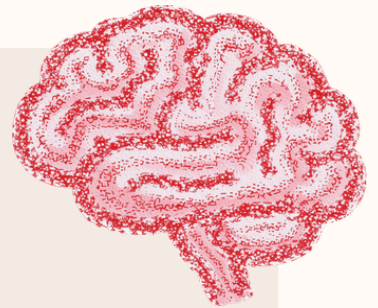

Each study has its own prize draw:

Complete Study 1 for a chance to win a \$100 voucher, and Study 2 for entry into a second \$100 voucher draw.

You might be a good fit if you:

- ★ are aged **55 to 85 years**
- ★ have access to a **smartphone or computer**
- ★ are in good general health, with **either no memory or thinking concerns, or mild changes** you've started to notice
