Dementia Care Essentials - Support Planning

For all staff working with or caring for people with dementia

This national, competency based accredited training is designed to assist workers caring for people with dementia. This unit of competency covers the knowledge and skills required by the worker to develop and implement support plans for clients with dementia in a variety of settings.

3 day program
Day 1: Develop the profile of a person with dementia including symptoms and behaviours
Day 2: Develop a support program identifying effective leadership and teamwork elements
Day 3: Develop strategies for the implementation and evaluation of a support program
Assessment: Includes an extra 30-50 minute interview (your facilitator will discuss details with participants), plus group participation in classroom activities, written work and evidence from the workplace. Assessment can be modified for people with varying levels of English literacy.

The completed competency can be credited towards further study in aged care.
